

## **FILEBOUND RELEASE NOTES**

### *Updated Website Features:*

- Fixed issue that would cause the browser window to hang on a blank page when clicking on a document listed on a user's homepage
- Home page items will now sort correctly when clicking on a column heading
- Fixed issue that would cancel all workflow routes if no checkboxes were selected when viewing the Advanced Workflow Status report and the Cancel button was clicked
- The Workflow Status report now displays the proper user that has pulled an item from a Workflow Queue step
- Fixed value check issue that would loop the workflow route continuously if no value is met

### *Updated Viewer (Document, Admin, Scanning) Features:*

- Clipboard Only user that does not have Print or Email rights will not be able to access these features in the viewer
- Optimized Server Process utilization to better handle document viewer sessions
- Fixed issue that allowed documents that were take offline to be seen within the Quick Viewer, they are no longer viewable
