

FileBound 5.5 Release Notes

New Features

Document Viewer

- **Viewer Launcher Supports Internet Explorer 9**
Users can now use Microsoft Internet Explorer 9 to view documents within the document viewer and use the Admin Viewer.
- **Viewer Launcher Supports both 32-bit and 64-bit Operating Systems**
Users no longer need to install a separate Viewer Launcher when using 64-bit operating systems.

Issues Resolved

Website

- File Security is no longer truncated at 250 characters.
- Viewing of HTML E-forms are now properly logged as document views.
- Single search results are now properly displayed when FileBound is installed using a 3-Tier architecture.
- Document views are now being properly logged.
- E-form Groups are now functioning properly.
- Uploaded Documents over 1MB are now being properly encrypted when encryption is enabled.

Document Viewer

- Printing more than 1 PDF at a time no longer leaves an Adobe Temp window active.
- The sort order for Separators is now being honored within the Archie Viewer.
